

ANNUAL INDEX

This periodical is indexed alphabetically under both Subject (Part 1) and Author (Part 2) entries.

In searching for a specific article the Author entry should be consulted if the name of the author is known since the complete bibliographic reference is to be found after the author's name only. When there are two or more authors for an article the complete entry as shown appears only under the name of the first author. Under the name of each of the joint authors a cross reference is made to the original author entry.

The titles under the subject entries are often inverted or shortened. The Subject index covers original articles, biographic material, book reviews, obituaries, editorial comments and news items.

R. indicates a book review; the title of the book is followed by the author's name, and is also listed by author under Book Reviews. Ed. indicates an editorial comment or news item.

Memorial notices appear under the heading Obituaries and under the names of individuals.

Entries concerning all meetings of scientific bodies will be listed under Association meetings.
